UFO Encounter Landing Inside the DMZ (Military Demarcation Line)

Affiliation: 21st Division, 65th Regiment, 1st Battalion, 2nd Company, 1st Platoon / Baekdu Mountain Unit

[How the report was received]

The attached file I am sending you is a UFO-related incident that occurred in the Korean Demilitarized Zone (DMZ). The informant was an active duty soldier who was working at a GP in the frontline DMZ at the time.

This is a remarkable encounter case where a soldier (corporal rank) was able to follow the entire situation from start to finish, and even get close enough to the inside of the DMZ where the UFO landed to see the object.

The report was forwarded to the President of the Korean UAP Society (Prof. Maeng Sung-ryul of Woosuk University), who then transferred it to the Center to investigate.

To investigate the case in detail, the Center conducted three preliminary phone interviews from July to early August, and then traveled to Daegu, where the informant lives, on August 23 to complete a face-to-face video interview.

The case was reported up to the division, a higher level unit, and three soldiers were dispatched to the scene to measure and photograph the unidentified object.

[Case Summary]

The incident began on May 23, 1982, in the bunker situation room (2F) of GP 853 (33 personnel/GOP, located 1 km further inland from the GOP) in Baekseoksan Mountain, Yanggu-gun, Gangwon-do, Korea, when Corporal Bae, who was serving as a GP situation officer, observed through an artillery sight.
- Situation Room: Staffed by a GP, an artillery observer, and three observation officers (Lt.)

The weather was unusually good that day.
Normally, there was no visibility at all as the clouds moved over the ridge.

The time was about 1:00 p.m. when suddenly, from the artillery observer next to me, who was giving the coordinates of the artillery fire in the open field, I heard, "A strange object sat down. A UFO has sat down in the open field!" (Open field- a

large, flat area of terrain with unobstructed views).

The ship's corporal immediately looks through his artillery scope and observes an unidentified object landing in the DMZ that looks like two giant sized soup bowls for a total of 6 minutes. (This is followed by a detailed observation with binoculars (unmade) for about 5 minutes.)

After observing the object clearly through the binoculars for about 2 minutes, you notice 6 soldiers from the Civil Guard Battalion coming from the north. The soldiers from the north were no longer approaching the object, but were observing it from a distance.

The shape of the UFO he saw was aluminum-colored, silver-gray in color, like a rice bowl (air) from top to bottom, with a rectangular structure in the middle with what appeared to be windows (a lighter silver-gray color than the silver of the hull) arranged in a row, and a small circular shape with a convex protrusion in the center of the upper part of the object.

Corporal Bae immediately sends a situation report to his superior unit, the regiment, stating, "A UFO is sitting in the open field ahead of 853 GP. The officer in the regimental situation room hears the report, reports to the division, and about 20 minutes later relays his instructions to Corporal Bae.

With instructions from the division to take photographs and measure the object's dimensions, Corporal Bae leaves the GP in a party of three, including himself and two privates, and heads to the location where the object has landed.

As he descends from the GP, which is high in the mountains, he takes about 20 photos with his film camera, and when he is almost 900 meters down, he uses triangulation to determine the dimensions of the object.

The triangulation estimated the object to be about 20 meters in diameter and 10 meters high.

As we approached to about 900 meters, we identified six North Korean soldiers (Min Kyung Battalion 129) who were already on the ground.

They saw a green curtain around the fuselage of the UFO, which was landing in an open field.

The three soldiers withdrew from the scene after about five to six minutes, fearing

an unpleasant encounter with North Korean forces.

About three and a half hours later, at around 5:00, the UFO takes off, climbs, and slowly flies toward Bunker 853.

Corporal Bae, who had been keeping an eye on the situation, told the artillery observer that he was going to go outside for a minute, then rushed out of the situation room and looked up to see the UFO hovering at low altitude about 20 meters above the MG50 submachine gun emplacement.

He says he heard a buzzing sound (similar to the sound an electric car makes when it's moving) and could see a shimmering green curtain around the craft.

At the mention of a UFO, all of the GP personnel at the time (30 people) came out of the bunker to stare at the scene in disbelief and let out a collective 'wow'.

The object stayed in the sky for about 30 seconds, and then, in less than a second, moved in a zigzag flight over the tip of the 7th Division unit, about 15 kilometers away, before stopping.

The UFO remained at that location for two to three seconds, then turned and flew back toward the GP in less than a second, zigzagging overhead again, before briefly hovering over the upper reaches of the North River between the 21st and 7th Divisions before climbing upward and disappearing.

The next year, more than a year after the incident, artillery observation showed that no grass had grown where the plane had landed.
